DESCRIPCIÓN

"Como resultado de estudios constantes de la investigación en el mundo entero, la acupuntura se puede considerar hoy día como parte completa de la medicina contemporánea. Se ha convertido en una técnica terapéutica de primera clase así como una especialidad real. La acupuntura es una ciencia antigua que ha estado ajustándose a las nuevas culturas y su pensamiento. Desde la época de Marco Polo, la acupuntura ha estado apareciendo de vez en cuando en ciencias médicas y se ha practicado en diversos países. Algunos documentos históricos y libros demuestran que ha estado pasando con períodos de esplendor moderado. La extensión importante más reciente de la Medicina Tradicional China por todo el mundo, ha sido realizada por un deseo especial de volver a la medicina y a los tratamientos natural...
